

ROTARY VOLUMETRIC FOOD FILLER FOR PAILS AND BAG-IN-A-BOX

Performance & Operating Efficiency

- Maximum capacity with fewer filling stations compared to other technologies
- Guaranteed accuracy of +/- 0.25% or better
- Top fill CIP nozzles
- Speeds up to 30 pails per minute
- Supports a wide range of container shapes with minimal changeover time

**Flexibility,
Performance and
Operating Efficiency**

ROTARY VOLUMETRIC VISCOUS FILLER FOR PAILS AND BAG-IN-A-BOX

Options:

- Special product supply bypass valves
- External CIP systems
- Conveyor drives and controls
- Clockwise or counter-clockwise orientation
- Automatic lubrication system
- UL/CE electrical panel certification

Standard Features:

- Volumetric timed-orifice filling system
- Sanitary 304 or 316L stainless steel wetted parts
- Top fill CIP nozzles with tool-less changeover
- Quick-change, tool-less container handling parts
- Automatic filling turret height adjustment
- OSHA compliant safety enclosure
- All stainless steel construction
- Allen Bradely variable frequency drives, PLC and HMI
- Maintenance-free drive system
- CIP catch trays with integrated frame gutters

Integrated Solutions:

In addition to integrated filling solutions, Pacific Packaging Machinery also offers rotary capping, sorting and conveying systems.

For slower speed applications, Pacific Packaging provides automatic inline filling solutions.
